APEX UNITED BRAND INTRODUCTION

Who we are:

APEX United Inc., a subsidiary of Guangdong Borrego New Science and Technology Material Co., Ltd (Guangdong Borrego), is the exclusive sales representative for the United States region. Located in Anaheim California, a strategic hub of the building materials industry, APEX United's mission is to provide high quality products, exceptional service, with most competitive price to U.S. customers. For all your engineered stone needs, APEX United Inc. is a one stop solution with direct access to the manufacturer. Currently, APEX United starts out with shower panel and slab and will be adding more engineered stone products and accessories in the near future.

Production Facility:

Guangdong Borrego is a design-oriented manufacturer of engineered stone and inorganic stones. The manufacturing facility sits on 64 acres of land with 10 production lines that generate over 5.4 million square meters of engineered granite slabs, inorganic stone blocks, trim lines, and wall panels annually (an additional investment over \$70 million for growth is currently under plan).

Products:

Engineered stone is an environmentally friendly product made from recycled natural stone. Using natural resin, or cement as bonding agent, the recycled natural stone undergoes vacuum migration and high-pressure vibration to form shaped products which are cured at room temperature. The final stone board is made after a series of treatment processes; including cutting, grinding, and polishing. This novel manufacturing technique not only allows for efficient use of raw materials, but also a product with high quality, high in density but easy to cut and process. This unique characteristic allows engineered stone to be applied to a wide range of applications in commercial, industrial, or residential buildings such as walk-ways, lobby walls, bathrooms, living rooms, kitchen, counter-tops etc.
